Lab - 5

TEAM

Amit Sahu (18mis7250)

Gaurav Gupta(18MIS7107)

User Stories

- As a Product owner I want to organize the product development of Books Bazaar and hence understand my colleagues progress, so I can better report our success and failures. Also the Product development being content with the main idea and not deviating from it . Giving a Rental system and increasing the Affordability hence the reach of Books is our aim.

- I as a Development Lead, want the project, to have a simplified rental system and complete the sprints on time

- I as Tester and Auditor, want to test the project and keep updating its backlogs, so that we can deliver the project with efficiency and minimal bugs.

- I as a stakeholder is responsible for conveying his wishes and concerns to the product owner or else the product owner would not be responsible for his project quality and time duration. I will provide regular input to queries from the Product Owner.

- I as a Development team member, I want to make sure all the required skills are used to transform the ideas and requirements into a successful product that will provide the best services to end-users

- As a scrum master, I have to make sure that the teams that are working on a project are able to achieve specific milestones and deliverables. Also making sure that everyone is working collaboratively by overcoming potential problems resulting in successful delivery of product
